Our experience is your advantage.

Serbian Consulting Network

Our Expertise

GovTech & FEC Reporting

Full-featured FEC (US Federal Election Commission) reporting system, integrating with the FEC API endpoints.

FinTech & e-Banking

E-banking frontend and backend, seamlessly integrating with the Avaloq core banking system for a secure and modern user experience.

E-Learning Platforms

Comprehensive learning management systems (LMS) with video lectures, documentation, testing modules, and success analysis tools.

1/2

PropTech & Real Estate Marketing

Interactive real estate visualizations and sales management systems for new developments, tracking sales performance in real-time.

Renewable Energy Analytics

Predictive analytics platform to optimize electricity production from solar and wind sources, maximizing efficiency and ROI.

Smart Agriculture

Field management system using Google Maps integration for tracking plowed fields, agricultural measures, and weather data analytics.

Our Expertise

ERP / Business Management Systems

Including invoicing and financial/accounting modules with tax compliance, import/export management, orders and shipping and product planning, inventory control and supply chain integration.

We bring decades of experience in architecting and delivering software solutions that seamlessly support complex business processes across diverse domains. Our strength lies in combining technical precision with strategic insight, building scalable, secure, and user-centric systems that drive efficiency and innovation.

This breadth of experience ensures that every project benefits from proven practices, innovative thinking, and a commitment to excellence that turns challenges into opportunities.

Grant Management and Donor Funded Project Management Systems

Designed to handle donor-funded projects, that includes accounting modules (invoices, cashbooks, monthly reports), database of experts, timesheet tracking. It ensures transparency and audit readiness for EU requirements.

Secure Online Auction Management Platforms

Platforms that support bidding, pricing, and transaction flows for both digital and physical goods.

Automotive Certification & Vehicle Assurance Platform

Focuses on vehicle inspection, certification, and warranty services, provides trust signals to buyers by verifying condition and history.

Patient Recruitment for Clinical Trials in Pharmacy

Bridge between pharmaceutical companies (sponsors) and the patients needed to test new medical therapies.

And 100+ successful websites, webshops, media EPKs, social aggregators, and mobile applications.
